

The Indiana No call list is a wonderful thing. Prior to this list very few if any days went by that I did not receive at least one call. Once upon returning from a 7 day vacation my caller id which has a 50 number memory was full of unidentified calls. We all know that those were telephone solicitations. Weakening this law would be an insult to the voters and citizens of Indiana. The law as it is works and allows people like me to be free from the harassment of telephone solicitations. Please do not weaken this law.
